

BIG SOLUTIONS, START TO FINISH WITH MIDLAND ARCHITECTURAL DOORS

First impressions are everything. When you buy a Midland Architectural Door you're not purchasing a run-of-the-mill door; you're investing in show-stopping modern aesthetics that last. Whether it's a door to make your neighbors jealous, storefront curb appeal that wows your customers, or an office divider that impresses clients and employees, we'll work alongside you and the builders and architects to turn your vision into reality.

We build each door Midwest tough, so it can handle the elements outside or the hustle and bustle inside. And we deliver and install our Architectural Doors on time, every time. There's no one that offers customer service quite like us.

A first impression is a lasting impression. Ensure it's a good one with ***Midland Architectural Doors.***

FROM CONCEPT TO INSTALLATION, AND LIFE-LONG SERVICE, MIDLAND OPENS DOORS.

MIDLAND ARCHITECTURAL DOORS

Aesthetics: Available in bi-fold and hydraulic lift styles with nearly any finish and in virtually any size and color to reflect your desired style. The operating system is mounted and concealed in the door's headers while the lifting mechanisms are hidden behind the door's uprights, resulting in clean lines and enhanced headroom.

Functional: Modern aesthetics. Functional purpose. Eye-catching design. Provides shade when open to keep restaurant and bar patrons cool, divides interior spaces into multiple meeting rooms, and enhances traffic flow in and out of buildings by opening up an entire wall.

Durability: All-steel construction, a robust electric or hydraulic system and engineering to meet deflection requirements provide extreme durability in any environment on an internal or external wall.

Safety: Optional safety switches stop the door if anything interferes during opening or closing, and our exclusive 5-to-1 safety factor ensures the door's load-carrying capacities exceed the actual load.
